

IENA Consulting, an IBM Gold Partner, is a French leading company specialised in performance management and business intelligence solutions. We assist medium sized and multinational companies in driving performance and process improvement projects .

To support our growth, we are recruiting a junior Business Intelligence Consultant for a six month pre-employment internship.

After a complete Cognos TM1/Planning Analytics training program, you will join our teams to participate in designing and developing complex Financial Budgeting, Forecasting and Reporting applications for various companies. For this purpose, you will be involved in the following assignments :

- Analyse business requirements
- Interpret fonctionnal and technical specifications
- Model and develop multidimensional data cubes
- Implement performance management applications according to our best practices

This list includes the main tasks but is not limited.

You are completing a master degree in mathematics, information technology or computer sciences and you are looking for an exciting end-of-course internship that will allow you to work in demanding and fast changing environments. We are looking for an enthusiastic and proactive candidate, with strong interpersonal skills, who will be able to communicate with diverse audiences. Join our teams and you will live a great human and professional experience in Paris, as you will work with highly skilled consultants willing to push you forward. You will be offered a full training program, a fast track career and an attractive package. You need to be fluent in French, or nearly.
